

# Street and Storm Lift Station Waste

## Roll Off Container Filters

Several municipalities and private owned companies incorporate the use of Container Filters to dewater materials that are collected by vacuum trucks. Once the material has been dewatered, it is transported and disposed of at a local registered landfill.

Pictured are three (3) Model RB-25-O-S Container Filters being used by the Sacramento County Water Quality Department. Other cities operating similar equipment include Portland, Seattle, as well as the City of New York.

Roll-off Container Filters come in sizes ranging from 20 cubic yards to 40 cubic yards.
