

Grease Trap and Septic Tank Waste

Sludge Mate® Container Filters

Flo Trend® System's Sludge Mate® Container Filters offer an economical solution to dewatering various types of sludge. They provide a simple application that will dewater grease trap, septic tank, as well as portable toilet waste. Once the material has had time to dewater adequately, it will pass the paint filter test and can be transported to an approved disposal site.

Pictured are three applications where Sludge Mates® are being used to dewater waste in Alabama, Florida and Tennessee.

Roll Off Style Sludge Mates® come in sizes ranging from 15 - 40 cubic yards.
Trailer Mounted Units are available from 5 - 40 cubic yards and
Tipping Stand Mounted Units range in size from 12 - 40 cubic yards.
